Preethi Changes

Though Preethi's parents are not very educated, they are trying their best to give their daughters an education. However, she was not very good in her studies and kept failing her exams. Though she failed, her teachers kept promoting her to the next standard as they could not give her the extra attention that she needed to do well in her studies. However, this changed after Preethi started coming to HOPE foundation's computer centre. She started learning more through the educational CDs available there. Even Preethi's teachers have noticed the change and informed her parents that it was because Preethi attended the centre that they saw these changes in her.

Helping Students Learn the Basics

41 students from an Urdu medium school are enrolled in the HOPE foundation's computer training centre. It was quite a challenge for the teachers as the students did not even know basic English. However, despite the fact that they did not know English, the students were very eager to learn. They studied English first so that they would be able to understand the fundamentals of computers. They quickly progressed after this and were soon learning to use the computer. They were very excited to learn how to draw pictures on the computer. Now, the students enjoy both English and computer classes equally.
