## Soumya Beters Herself

Soumya Salimkumar, residing in Pettah, is a 17-year-old girl currently studying in the 12<sup>th</sup> standard. Her father works hard as a daily wage labourer to provide for the family of 6. With their daily needs barely being met, Soumya worried about completing her studies. Soumya wanted to start helping her father financially as soon as possible but also realised that without computer knowledge, she would not be able to find a job. She enquired in different computer centres but their fees were way beyond what she could afford. She was very disheartened until she came to know about the HOPE *foundation* computer training centre from a friend. She and her sister enrolled in the course. They are extremely happy and are giving their best to learn the course. The family is very grateful to HOPE *foundation* for giving their daughters a chance to better themselves.

### Statistics:
